

MERICI COLLEGE GREEN TIP #22 - The (in)convenient packet problem....

This is in our bins. Too much!

To be part of the solution:

Buy a large packet and put a serving in a small container to send to school.
Once finished, the large packet can be added to your soft plastic collection at home and taken to Coles to be recycled by RedCycle where it can become something useful, such as park equipment, pictured below.

If small packets are brought to school, please take them home to add to your soft plastic collection.

By doing so, these packets will not end up in landfill or out in our environment.

You can close the loop on soft plastics and keep them out of the school.
