

WEEKLY DIGITAL CHECK-IN

CHECK YOUR CHILDREN'S APPS

ON YOUR CHILD'S APPLE ID (Family Sharing)

In the App Store, click the icon (your Apple ID photo) on the right hand side.

Click "Purchased". You can check your children's individual Apple ID's for downloaded apps.

Ensure you don't turn off "Ask-to-Buy" so you can approve any app purchases.

ON YOUR APPLE ID

In "Settings" scroll down to very bottom. A list of all your apps will appear.

If your child uses any of your devices using your Apple ID, it is important to be aware they will have access to all of these apps.

ON A SEPARATE APPLE ID (Not Family Sharing)

You will need to go directly to your child's device and check the apps listed.

ON AN ANDROID DEVICE

Settings/Google/
Security / Google Play Protect – you will see the latest apps downloaded.

By setting up a child's Google Account in your Family Link app, you will be able to use the Parental Controls to restrict access to the Family Library Content.
